SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

The global economy is so far weathering headwinds better than expected. Incoming activity data for the fourth quarter of 2022 beat expectations, even though they do point to continued slowing momentum. Global real GDP is forecasted to grow by 2.3 percent in 2023, down from 3.3 percent in 2022. Most of the weakness will be concentrated in Europe, Latin America and the US, though it is weighing on the industrial sector globally. Asian economies are expected to drive most of global growth in 2023, as they benefit from ongoing reopening dynamics and less intense inflationary pressures compared to other regions.

After rising sharply over 2021 and much of 2022, inflation in most of the world is slowing, mostly driven by falling energy and food prices and fading supply chain pressures. This is paving the way for a reduction in the pace and intensity of interest rate hikes by the world's major central banks, suggested at their recent meetings. However, the inflation outlook remains uncertain. Core inflation, which excludes volatile items, is proving more resilient. Therefore, monetary policy is likely to remain restrictive throughout most of 2023. This will act as a break on economic activity and will likely lead to increases in unemployment rates in various economies, particularly in Europe and the US.

Global real GDP growth should pick up steam in 2024 to 2.7 percent and be more evenly distributed among regions. Tailwinds to growth in 2024 will largely come from fading shocks related to the pandemic, elevated inflation, and monetary tightening. However, growth rates in 2024 and beyond are likely to be below the pre-pandemic trend, given ongoing supply-side weakness (e.g., ageing demographics worldwide and slow productivity growth).

The 10-year economic outlook signals a prolonged period of disruptions and uncertainties for businesses, but there are also opportunities. Global growth will return to its slowing trajectory once the 2022-2023 regional recessions end, with mature markets making smaller contributions to global GDP over the next decade. Nonetheless, there are still opportunities for firms to invest in both mature markets—given their wealth and need for innovation to compensate for shrinking labor forces—and emerging markets—given their need for both physical and digital infrastructure to support their sizable and young labor forces. Keys to ensuring growth over the longer term include developing new lines of business; strengthening corporate culture; embracing digital transformation and automation; recruiting for talent with new skills not currently represented in the company; and maximizing the hybrid work model where it makes sense.

SECTION III - RISK FACTORS

An investment in equity involves a high degree of risk. Investors should carefully consider all the information in this Draft Prospectus, including the risks and uncertainties described below, before making an investment in our equity shares. Any of the following risks as well as other risks and uncertainties discussed in this Draft Prospectus could have a material adverse effect on our business, financial condition and results of operations and could cause the trading price of our Equity Shares to decline, which could result in the loss of all or part of your investment. In addition, the risks set out in this Draft Prospectus may not be exhaustive and additional risks and uncertainties, not presently known to us, or which we currently deem immaterial, may arise or become material in the future. Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other risks mentioned herein.

The Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the considerations described below and elsewhere in the Draft Prospectus.

MATERIALITY

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality:

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in the future.

Classification of Risk Factors

NOTE:

The risk factors are disclosed as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in "RISK FACTORS" and elsewhere in this Draft Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in our restated financial statements prepared in accordance with Indian GAAP.

Unless otherwise specifically provided in the respective Risk factors given below, the amounts of impact of risks specified hereunder, on our financial conditions, are not quantifiable.

INTERNAL RISK FACTORS

1. **The property used by the Company for the operation purpose of its storage is not owned by us. Any termination of the relevant lease agreement or rent agreement in connection with such property or our failure to renew the same could adversely affect our operations.**

Our Registered Office premise is situated at A-21, 2nd Floor, Amrapali Complex, Nr. City Gold Cinema, S.P Ring Road, Bopal, Ahmedabad, India and the Godown is situated at Near Pipe Zone, Navapura Patiya, Changodar. We

have entered into monthly rental agreements with the owners of the said premises. For further details, see section “BUSINESS OVERVIEW” on page no. 82 of this Draft Prospectus. If we are required to vacate the current premises, we would be required to make alternative arrangements for new offices and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/ favorable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

2. The demand and pricing in the steel industry is volatile and are sensitive to the cyclical nature of the industries it serves. A decrease in steel prices may have adverse effect on our business, results of operations, margins and financial condition.

Steel prices fluctuate based on a number of factors, such as the availability and cost of raw material inputs, fluctuations in domestic and international demand and supply of steel and steel products, worldwide production and capacity, fluctuation in the volume of steel imports, transportation costs, protective trade measures and various social and political factors. When downturn occur in these economies /sectors, we may experience decreased demand for our products, which may lead to a decrease in steel prices and in turn, have a adverse effect on our revenue, margins, financial condition and prospects. In addition, substantial decreases in steel prices during period of economic weakness have not always been balanced by commensurate price increases during periods of economic strength. Any sustained price recovery will most likely require a broad economic recovery, in order to underpin an increase in real demand for steel products by end users.

3. We generate a substantial portion of revenue from Gujarat Region. Any adverse developments affecting our operations in the Gujarat Region could have an adverse impact on our revenue and results of operations.

Our Company is working in more than 6 States among which, our Revenue are majorly dependent on the one State i.e. Gujarat. We generate almost 97.73%, 97.18% and 98.29% of the Total Revenue generated for the financial year ended 31st March, 2023, 2022 and 2021 respectively. Such geographical concentration of our business in the Gujarat region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in the region, which may adversely affect our business prospects, financial conditions and results of operations.

Factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in Gujarat region, and our experience in the Gujarat region may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with suppliers, dealers, relevant government authorities, or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside Gujarat market may adversely affect our business prospects, financial conditions and results of operations.

4. Our Revenue from Black pipe/MS Pipe and Structural Pipe contribute significantly to our revenue from operation. Any loss of business from such product may adversely affect our revenues and profitability.

Our Revenue from Black pipes/MS Pipe and Structural Pipe, contributes 94.42%, 91.25% and 91.78% of our Total Revenue from operation for the financial year ended March 31, 2023, 2022 and 2021, respectively. Any decline in our quality standards, growing competition and any change in the demand for the product may adversely affect our ability to retain clients from these sectors. We cannot assure that we shall generate the same quantum of business, or any business at all, from this segment, and loss of business from any one or both sectors may adversely affect our revenues and profitability. However, the composition and revenue generated from this segment might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

5. Our Peer Review Auditor and Statutory Auditor of the Company are not same.

Our Peer Review Auditor and Statutory Auditor of the Company are not same. Although, our Statutory Auditor is also having Peer Review Certificate issued by The Institute of Chartered Accounts of India but our company has appointed separate Peer Review Auditor to maintain more transparency on the financials statement.

6. We have had certain inaccuracy in relation to regulatory filings to be made with the RoC and our company has made non-compliances of certain provision under applicable law.

Our Company has in the past not complied with certain provisions of the Companies Act, 2013. For instance, the forms which were filed with Registrar of Companies have some factual discrepancy and errors. Due to absence of professional guidance on the matter, we did not follow the prescribed procedures as laid down under the relevant sections of Companies Act but now to overcome the situation our Company has appointed a Whole-Time Company Secretary and Compliance Officer. Although no show cause notice have been issued against the Company till date in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, penal actions may be taken against the Company and its directors, in which event the financials of the Company and its directors may be affected.

7. Our success depends largely upon the services of our Promoters, Managing Directors and other key managerial personnel and our ability to attract and retain them.

We are dependent on our Promoters, Managing Director and Key Managerial Personnel for setting our strategic direction and managing our businesses. Over past years, our Promoter have built relations with suppliers, customers and other persons who are connected with us. Accordingly, our Company's performance is dependent upon the services of our Promoters, our Managing Director, and other key managerial personnel. Our future performance will depend upon the continued services of these persons. Demand for key managerial personnel in the industry is intense and our inability to attract and retain key managerial personnel may affect the operations of our Company.

8. We are dependent upon few suppliers for the material requirements of our trading business. Loss of any of our suppliers or a failure by our suppliers to deliver the products may have an adverse impact on our ability to continue our operations without interruption and our ability to deliver the products to our customers without any delay.

We procure our products i.e. ERW MS/ GI/Black Pipes on a purchase order basis and have not entered into long term contracts with our suppliers. Accordingly, we may encounter situations where we might be unable to deliver our products due to, our inability to predict the increased demand for our products. Our top 4 suppliers contributes 84.87%, 91.56% and 91.69% of the Total Purchase for the financial year ended March 31, 2023, 2022 and 2021. Any problems faced by our supplier resulting in delays or non-adherence to quality requirements could adversely impact our ability to meet our customer's requirements in time and our operations would be affected to the extent we are unable to line up supplies from alternate suppliers.

9. Our Company is dependent on third party transportation providers for the delivery of our products and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.

Our Company uses third party transportation providers for the delivery of our products to customers. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on the supplies from our suppliers and deliveries to our customers. These transportation facilities may not be adequate to support our existing and future operations. In addition, the materials, and products maybe lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of raw materials and products, which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our products to our customers may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, strikes, lockouts, inadequacies in the road infrastructure and port facilities, or other events could impair our ability to supply our products to our customers. Any such disruptions could materially and adversely affect our business, financial condition, and results of operations.

10. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registrations and permits, some of which may expire and for which we may have to make an application for obtaining the approval or its renewal. We will be applying for certain approvals relating to our business. If we fail to maintain such registrations and licenses or comply with applicable conditions, or a regulatory authority claims we have not complied, with these conditions, our certificate of registration for carrying on a particular activity may be suspended and/or cancelled and we will not then be able to carry on such activity. This could materially and adversely affect our business, financial condition, and results of operations. We cannot assure you that we will be able to obtain approvals in respect of such applications or any application made by us in the future. For more

information about the licenses required in our business and the licenses and approvals applied for, please refer “GOVERNMENT AND OTHER APPROVALS” on page no. 133 of this Draft Prospectus, respectively.

11. We have referred to the data derived from internal Company reports and industry and government publications, publicly available information, and sources.

Unless stated otherwise, industry and market data used throughout this Draft Prospectus has been obtained or derived from internal Company reports and industry and government publications, publicly available information, and sources. Industry publications generally state that the information contained in those publications has been obtained from sources believed to be reliable but that their accuracy and completeness are not guaranteed, and their reliability cannot be assured. Although, our Company believes that industry data used in this Draft Prospectus is reliable, it has not been independently verified. Further, the extent to which the industry and market data presented in this Draft Prospectus is meaningful depends on the reader's familiarity with and understanding of, the methodologies used in compiling such data. There are no standard data gathering methodologies in the industry in which we conduct our business, and methodologies and assumptions may vary widely among different industry sources.

12. Our business is a High Volume-Low Margin Business.

Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results, debt service capabilities and financial conditions. Due to the nature of the products we sell, we may not be able to charge higher margins on our products. Hence, our business model is heavily reliant on our ability to effectively grow our turnover and manage our key processes including procurement of finished goods from suppliers, timely sales/ order execution and continuous cost control of core as well as non-core activities. The table below gives details of our Operating Margins and Net Profit margin based on restated financials.

Particulars	As at 31 st March		
	2023	2022	2021
Revenue (Rs. In Lakhs)	4,722.58	4,718.49	3,597.28
EBITDA Margins (in %)	7.49%	1.72%	2.70%
PBT Margins (in %)	5.78%	0.28%	0.63%
PAT Margins (in %)	4.27%	0.13%	0.37%

13. We operate in a highly competitive industry. Any inability to compete effectively may lead to a lower market share or reduced operating margins.

We operate in a highly competitive industry with a number of other distributors that deals in competing products. As a result, to remain competitive in the market we must continuously strive to reduce our distribution costs and improve our operating efficiencies and expand our products offering. If we fail to do so, it may have an adverse effect on our market share and results of operations.

Many of our competitors may be larger than us and may benefit large distribution network and operating efficiencies. There can be no assurance that we can continue to effectively compete with such distributors in the future, and failure to compete effectively may have an adverse effect on our business, financial condition and results of operations. Moreover, the competitive nature of the distribution industry in steel prices may result in lower prices for our products and decreased profit margins, which may materially adversely affect our revenue and profitability.

14. Our Promoter and Promoter Group will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters.

Upon completion of this Issue, our Promoter and Promoter Group will continue to own a majority of our Equity Shares. As a result, our Promoter and promoter group will have the ability to exercise significant influence over all matters requiring shareholders' approval. Our Promoter and promoter group will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoter and promoter group could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and promoter group, or the

perception that such sales may occur may significantly affect the trading price of the Equity Shares. Except as disclosed in “CAPITAL STRUCTURE” on page no. 40 of this Draft Prospectus, we cannot assure you that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

15. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

16. In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoters and Directors, they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Companies / Entities.

Our Promoters - Directors are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoters and Directors are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Company / Entity which may be or may not be at Arms' Length Price and in Ordinary Course of Business. If the transactions are executed not on Arms' Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. For details of transactions already executed by our Company with our Promoters, Directors and Group Companies / Entities during last three years, please refer to the “Annexure-31” - “RELATED PARTY TRANSACTION” on page 25 under the Chapter titled “RESTATED FINANCIAL INFORMATION” beginning on Page No. 119 this Draft Prospectus.

17. Our Company has in the past entered into related party transactions and may continue to do so in the future and we cannot assure you that we could not have achieved more favorable terms if such transactions had not been entered into with related parties. And will not have an adverse effect on our financial conditions and result of operations.

Our Company has entered into various transactions with related parties. While our Company believes that all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms, there can be no assurance that we could not have achieved more favorable terms had such transactions been entered into with unrelated parties.

It is likely that our Company may enter into related party transactions in the future. Such related party transactions may potentially involve conflicts of interest. We cannot assure you that such transaction, individually or in the aggregate, will always be in the best interests of our Company and/or that it will not have an adverse effect on our business and results of operations.

18. Our management has discretion in how it may use the proceeds of the Offer. Any variation in the utilization of our Net Proceeds would be subject to certain compliance requirements, including prior shareholders' approval.

Our use of the proceeds of the Offer is at the discretion of the management of our Company. As described in the section titled “OBJECTS OF THE ISSUE” on page 60, we intend to use the Net Proceeds for various purposes, including but not limited to, (i) To Meet Incremental Working Capital Requirements (ii) General Corporate Purposes; and (iii) To meet Public Issue Expenses. However, we have not entered into any definitive agreements and do not have any definite and specific commitments towards the aforementioned purposes for which our Company intends to use the Net Proceeds. Further, the Net Proceeds are intended to be utilized by the Company only and none of the members of our Promoter Group or Group Companies will

receive any portion of the Net Proceeds. The planned use of the Net Proceeds is based on current conditions and is subject to changes in external circumstances, costs, other financial conditions or business strategies. Any variation in the planned use of the Net Proceeds would require Shareholders' approval and may involve considerable time or cost overrun and in such an eventuality it may adversely affect our operations or business. In the event that there is such a change in the objects of the Offer, our Promoters shall provide an exit offer to dissenting shareholders as provided for in the Companies Act, 2013 and in terms of the conditions and manner prescribed under the SEBI ICDR Regulations.

19. Our Object has not been appraised by any Bank or Financial Institution. Any significant deviation in the Object could adversely impact our operations and sustainability in absence of any independent monitoring agency.

We have estimated fund raising to the extent of ₹ [●] Lakhs to finance the 'OBJECTS OF THE ISSUE' (including Issue Expenses). The proposed objects for which the funds are being raised have not been appraised by any Bank or Financial Institution and the fund requirements are based primarily on management estimates. There is no guarantee that our estimates will prove to be accurate and any significant deviation in the project cost could adversely impact our operations and sustainability in the absence of any independent monitoring agency. For details of the "OBJECT OF THE ISSUE", please refer Page no. 60 of this Draft Prospectus.

20. There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

The issue proceeds is entirely at the discretion of the issuer/management. As per SEBI (ICDR) Regulations, 2018, appointment of monitoring agency is required only if Issue size exceeds ₹ 10,000 Lakh. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, as per the Section 177 of the companies Act, 2013 the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

21. We could be adversely affected if we fail to keep pace with technical and technological developments in the Industry in which we are operating.

To meet our customer's needs, we need to regularly modernize existing technology and acquire or develop new technology for our business. In addition, rapid and frequent technology and market demand changes can also render existing technologies and equipment obsolete, requiring substantial outlay in capital expenditures and/or write-downs of obsolete assets. Our failure to anticipate or to respond adequately to changing technical, market demands and / or client requirements could adversely impact our business and financial results.

22. The average cost of acquisition of Equity shares by our Promoters is lower than the Issue price. Our promoters average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity shares as given below:

S. No.	Name of the Promoters	No. of Equity Shares held	Average Cost of Acquisition per equity share (in ₹)*
1.	Mr. Vikram Shivratan Sharma	4,80,000	0.83
2.	Mr. Bharat Shivratan Sharma	3,60,000	0.83

*The average cost of acquisition of Equity Shares by our Promoters has been calculated by taking into account the amount paid by them, by way of fresh issuance or transfer, the Equity Shares less amount received by them for the sale of Equity Shares through transfer, if any and the net cost of acquisition has been divided by total number of shares held as on date of the Draft Prospectus.

23. We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favorable terms at a future date, may have an adverse effect on our operations, profitability and growth prospects.

Our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favorable terms, at a future date, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects.

Summary of our working capital position is as given below:

Our Working capital requirements are in line with the industry standards. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “OBJECTS OF THE ISSUE” beginning on page 60 of this Draft Prospectus.

24. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the issue. Further we have not identified any alternate source of financing the “Objects of the Issue”. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our bank finance, debts, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans.

For further details please refer to the chapter titled “OBJECTS OF THE ISSUE” beginning on page 60 of this Draft Prospectus.

25. Certain information contained in this Draft Prospectus is based on management estimates and we cannot assure you of the completeness or accuracy of the data.

Certain information contained in this Draft Prospectus like our funding requirements and our proposed use of issue proceeds is based solely on management estimates. The estimated dates as well as costs may change depending on the circumstances like changes in laws and regulations, competition, irregularities, the ability of third parties to complete their services, delays and cost overruns. Such circumstances can have an impact on our financial condition and results of operation.

26. Our Company has made application for registration of trademark, which is under process of registration. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.

The current status of the application for registration of trademark is as follows:

Logo	Authority Granting Approval	Applicable Laws	Nature of Approvals	Application No . & Date	Current Status

Logo	Authority Granting Approval	Applicable Laws	Nature of Approvals	Application No. & Date	Current Status
	Registrar of Trade Mark	The Trade Marks Act, 1999	Certificate of Registration of Trade Mark, Section 23(2), Rule, 62(I)	6024140 and 17 th July, 2023	Under Process

The registration for the said trademark in our name is important to retain our brand equity. If our application for registration is not accepted or if the oppositions filed against our trademark application if any, are successful, we may lose the statutory protection available to us under the Trade Marks Act, 1999 for such trademark. Further, we cannot assure that our pending application would be granted registration or if granted registration, will not be invalidated or circumvented. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.

27. The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19.

The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing “stay-at-home” orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown lasted until May 31, 2020, and has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices.

28. Failure to manage our stocks could have an adverse effect on our net sales, profitability, cash flow and liquidity.

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirement accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of supply or an accumulation of excess inventory. The excess stocks will need storage space and block our liquidity resulting in to loss.

29. We could be exposed to risks arising from misconduct, fraud and trading errors by our employees and Business Associates.

Frauds or other delinquencies by employees could include indulging in transactions that exceed authorized limits or present unacceptable risks to us; hiding unauthorized or unsuccessful trading activities from us; or the improper use of confidential information. Such misconduct could result in unexpected business risks, losses, invite regulatory sanctions and seriously harm our reputation and could even lead to litigation. The precautions we take to prevent and detect these activities may not be effective. Any delinquencies or trading errors on the part of our employees could materially affect our business operations, financial position and/or reputation.

30. We have to update the name of our company in some of the statutory approvals and certificates due to the conversion of our Company in to Public Limited Company.

Some of our statutory approvals and certificates are in the name of “Shree Marutinandan Tubes Private Limited”. Since our company is converted into a public limited company pursuant to shareholder’s resolution dated 14th June, 2023 and fresh certificate of incorporation dated 22nd June, 2023 we have to update the name “Shree Marutinandan Tubes Limited” on the statutory approvals and certificates. We cannot ensure that we will be able to update the said documents in a timely manner.

For more information about the licenses required in our business, please refer section "GOVERNMENT AND OTHER APPROVALS" beginning on page no. 133 of this Draft Prospectus.

EXTERNAL RISK FACTORS

After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

GLOBAL ECONOMIC OUTLOOK

The global economy is so far weathering headwinds better than expected. Incoming activity data for the fourth quarter of 2022 beat expectations, even though they do point to continued slowing momentum. Global real GDP is forecasted to grow by 2.3 percent in 2023, down from 3.3 percent in 2022. Most of the weakness will be concentrated in Europe, Latin America and the US, though it is weighing on the industrial sector globally. Asian economies are expected to drive most of global growth in 2023, as they benefit from ongoing reopening dynamics and less intense inflationary pressures compared to other regions.

After rising sharply over 2021 and much of 2022, inflation in most of the world is slowing, mostly driven by falling energy and food prices and fading supply chain pressures. This is paving the way for a reduction in the pace and intensity of interest rate hikes by the world’s major central banks, suggested at their recent meetings. However, the inflation outlook remains uncertain. Core inflation, which excludes volatile items, is proving more resilient. Therefore, monetary policy is likely to remain restrictive throughout most of 2023. This will act as a break on economic activity and will likely lead to increases in unemployment rates in various economies, particularly in Europe and the US.

Global real GDP growth should pick up steam in 2024 to 2.7 percent and be more evenly distributed among regions. Tailwinds to growth in 2024 will largely come from fading shocks related to the pandemic, elevated inflation, and monetary tightening. However, growth rates in 2024 and beyond are likely to be below the pre-pandemic trend, given ongoing supply-side weakness (e.g., ageing demographics worldwide and slow productivity growth).

The 10-year economic outlook signals a prolonged period of disruptions and uncertainties for businesses, but there are also opportunities. Global growth will return to its slowing trajectory once the 2022-2023 regional recessions end, with mature markets making smaller contributions to global GDP over the next decade. Nonetheless, there are still opportunities for firms to invest in both mature markets—given their wealth and need for innovation to compensate for shrinking labor forces—and emerging markets—given their need for both physical and digital infrastructure to support their sizable and young labor forces. Keys to ensuring growth over the longer term include developing new lines of business; strengthening corporate culture; embracing digital transformation and automation; recruiting for talent with new skills not currently represented in the company; and maximizing the hybrid work model where it makes sense.

INDIAN ECONOMY OUTLOOK

India’s recovery from the pandemic was relatively quick, and growth in the upcoming year will be supported by solid domestic demand and a pickup in capital investment. The current growth trajectory will be supported by multiple structural changes that have been implemented over the past few years. The private sector – financial and non-financial – was repairing balance sheets, which led to a slowdown in capital formation in the previous decade. The financial system stress experienced in the second decade of the millennium, evidenced by rising nonperforming assets, low credit growth and declining growth rates of capital formation, caused by excessive lending witnessed in the first decade-plus, is now behind us. Aided by healthy financials, incipient signs of a new private sector capital formation cycle are visible. More importantly, compensating for the private sector’s caution in capital expenditure, the government raised capital expenditure substantially. Budgeted capital expenditure rose 2.7X in the last seven years, from FY16 to FY23, re-invigorating the Capex cycle. Structural reforms such as the introduction of the Goods and Services Tax and the Insolvency and Bankruptcy Code enhanced the efficiency and transparency of the economy and ensured financial discipline and better compliance.

Even as India’s outlook remains bright, global economic prospects for the next year have been weighed down by the combination of a unique set of challenges expected to impart a few downside risks. Multi-decadal high inflation numbers have compelled central banks across the globe to tighten financial conditions. The impact of monetary

tightening is beginning to show in slowing economic activity, especially in Advanced Economies. Besides this, adverse spillovers from the prolonged strains in supply chains and heightened uncertainty due to geo-political conflict have further deteriorated the global outlook. Hence, global growth is forecasted to slow from 3.2 per cent in 2022 to 2.7 per cent in 2023 as per IMF's World Economic Outlook, October 2022. A slower growth in economic output coupled with increased uncertainty will dampen trade growth. This is seen in the lower forecast for growth in global trade by the World Trade Organisation, from 3.5 per cent in 2022 to 1.0 per cent in 2023. On the external front, risks to the current account balance stem from multiple sources. While commodity prices have retreated from record highs, they are still above pre-conflict levels. Strong domestic demand amidst high commodity prices will raise India's total import bill and contribute to unfavourable developments in the current account balance. These may be exacerbated by plateauing export growth on account of slackening global demand. Should the current account deficit widen further, the currency may come under depreciation pressure. Another risk to the outlook originates from the ongoing monetary tightening exercise. While the pace of rate hikes has slowed, major central banks have reaffirmed their hawkish stance on inflation. Entrenched inflation may prolong the tightening cycle, and therefore, borrowing costs may stay 'higher for longer'. In such a scenario, global economy may be characterised by low growth in FY24. However, the scenario of subdued global growth presents two silver linings – oil prices will stay low, and India's CAD will be better than currently projected. The overall external situation will remain manageable. The upside to India's growth outlook arises from (i) limited health and economic fallout for the rest of the world from the current surge in Covid-19 infections in China and, therefore, continued normalisation of supply chains; (ii) inflationary impulses from the reopening of China's economy turning out to be neither significant nor persistent; (iii) recessionary tendencies in major AEs triggering a cessation of monetary tightening and a return of capital flows to India amidst a stable domestic inflation rate below 6 per cent; and (iv) this leading to an improvement in animal spirits and providing further impetus to private sector investment. Against this backdrop, the survey projects a baseline GDP growth of 6.5 per cent in real terms in FY24. The projection is broadly comparable to the estimates provided by multilateral agencies such as the World Bank, the IMF, and the ADB and by RBI, domestically. The actual outcome for real GDP growth will probably lie in the range of 6.0 per cent to 6.8 per cent, depending on the trajectory of economic and political developments globally.

OVERVIEW OF THE GLOBAL STEEL INDUSTRY

Steel is a paramount material in the fields of construction and engineering, finding widespread applications in industries such as automotive, construction, consumer goods, infrastructure, mechanical and medical equipment, packaging, and utensils, among others. Its popularity stems from its abundant availability, cost-effectiveness, exceptional strength and durability, ductility, and recyclability. According to the World Steel Association, there are more than 3,500 different grades of steel produced worldwide, each possessing unique physical, chemical, and environmental properties to suit various applications.

GLOBAL STEEL PRODUCTION AND CONSUMPTION

The global steel production capacity reached 2,452.7 MT in 2022, with Asia accounting for the largest share of 60%. China holds a dominant position in steelmaking capacity, production, and consumption, boasting the highest steel production capacity globally, followed by India and Japan. Additionally, the European Union, North America, Latin America, the Middle East, and Oceania also contribute significantly to the global steel production capacity.

Global crude steel production has grown at a 10-year CAGR of 1.5% to 1,885 MT in CY22 from 1,652 MT in CY13. However, crude steel production declined by ~4% y-o-y in CY22 from 1,962 MT in CY21 due to a slowdown in China, monetary tightening in the United States and Europe, inflationary pressure which led to the rise in input costs and supply chain disruptions caused due to the Russia-Ukraine war.

GLOBAL CRUDE STEEL PRODUCTION

[Source: Report of Assocham on “India Steel Sector Enhancing Competitiveness and Overcoming Challenges” for May, 2023].

The total crude steel production was 1,885 MT in CY22 out of which China continued to be the largest crude steel producer accounting for 54% share. However, Chinese production declined by 2% y-o-y to 1,018 MT in CY22 as compared to 1,035 MT in the previous year, due to lockdowns and restrictions enforced in the country due to the outbreak of Covid-19 and a slowdown of its real estate market.

China is also cutting down their production due to environmental concerns. India was the second largest producer of crude steel in CY22 with a 7% share, followed by Japan with a 5% share. The USA, Russia and South Korea accounted for a 4% share each in the total production during CY22.

GLOBAL STEEL DEMAND

Steel is being used in industries like energy, construction, automotive, transportation, infrastructure, packaging, and machinery. There has been a strong recovery in steel demand post the Covid-19 pandemic. In developed economies like USA, Europe, Japan and South Korea, the demand was driven by automotive and durable goods sector.

The demand in China reduced on account of movement restrictions and lockdown in the country on account of Covid-19 pandemic, environmental concerns, and target to lower carbon emission. However, the support by Chinese Government will aid in the recovery of demand with the resumption of construction and real estate activities.

The steel demand in India has been robust on account of increased investment on Infrastructure and policy support by the Government. Despite the inflationary pressure and uncertainties around the global economy, India witnessed a healthy demand from auto, consumer durables, capital goods and real estate sectors.

Global Steel demand

[Source: Report of Assocham on “India Steel Sector Enhancing Competitiveness and Overcoming Challenges” for May, 2023].

The global steel demand has increased at a CAGR of 1.7% from 1,636 MT in CY17 to 1,781 MT in CY22. The demand declined significantly in CY22, because global production was affected due to a slowdown in China, monetary tightening in the United States and Europe, inflationary pressures which led to the rise in input costs and supply chain disruptions caused due to the Russia-Ukraine war.

GLOBAL TRADE - STEEL EXPORTS

Global steel exports have been on an upward trajectory in the last decade, supported by rising consumption and reached 259 MT in CY21. However, exports declined to 235 MT in CY22 on account of Covid-19 pandemic and geopolitical tensions arising due to the Russia-Ukraine war which impacted the demand-supply situation.

As of CY2021, China is the largest steel exporter accounting for 14% of total exports. The exports from China are almost double compared to Japan, the second largest exporter of steel which accounts for 7%. Even though the export volumes from China have been declining since 2016, China has held on to the position of the largest steel exporter. Indian exports reduced significantly in 2022 on account of the imposition of an export duty in May 2022 to reduce pressure on domestic prices and secure its domestic steel supply chain. However, this duty was reversed in November 2022 post when the steel exports from India started to pick up.

Steel Imports

Europe Union (27) has been the largest importer of steel with a 10% share in global imports in CY21. This is mainly because EU27 doesn't have a large steelmaking capacity and relies heavily on imports. The USA (6.4%) and China (6.0%) are the second and third-largest importers of steel, respectively.

[Source: Report of Assocham on “India Steel Sector Enhancing Competitiveness and Overcoming Challenges” for May, 2023].

GLOBAL STEEL PRICE TRENDS

International steel prices remained in the range of Yuan 3,827 to Yuan 4,577 per tonne from March 2018 to September 2020. The prices started increasing in December 2020, mainly on account of the supply disruptions caused by the Covid-19 pandemic. Escalated prices were further supported by the impact of the Russia-Ukraine war which commenced in February 2022.

The prices started declining in June 2022 and fell to pre-Covid levels of Yuan 4,250 per tonne in December 2022 due to weak demand from the largest consumer China on account of lockdowns and Covid-19-related restrictions and weak global demand. Also, the fall in iron ore and coking coal prices have impacted international steel prices and caused the decline. There was a relaxation in Covid-19 restrictions in China post-December 2022 and iron ore and steel prices have started rising gradually on expectations of demand recovery.

Trend in International Steel Price:

[Source: Report of Assocham on “India Steel Sector Enhancing Competitiveness and Overcoming Challenges” for May, 2023].

OUTLOOK

World Steel Association forecasts' the steel demand to increase by 2.3% to 1,822.3 MT in CY23 and 1.7% to 1,854 MT in CY24 compared to a decline of 6.2% in CY22. This growth will be led by a recovery in manufacturing activity, China's reopening and easing of supply chain bottlenecks, however, persistent inflation and high-interest rates will limit the demand recovery.

Steel Demand Growth Estimates

[Source: Report of Assocham on “India Steel Sector Enhancing Competitiveness and Overcoming Challenges” for May, 2023].

The steel demand in China, which accounts for more than half of global consumption, is expected to grow by 2% in CY23 and remain flat in CY24. Chinese steel demand contracted in CY22 due to lockdowns which led to the

deceleration of the Chinese economy. Challenges in real estate intensified in CY22 and put pressure on construction activities. However, the situation is expected to improve and a slight pickup in the real estate sector is likely on account of government support. Further, government-supported infrastructure investments will also support steel demand.

The advanced economies including the European Union (27), the United States, Japan, and South Korea, witnessed 6.2% decline in steel demand in 2022 due to the Russia-Ukraine war, high energy costs and rising interest rates. World Steel Association expects demand from advanced economies to grow by 1.3% in 2023 and 3.2% in 2024. The growth will be supported by the alleviation of the war impact and supply chain disruptions in the European Union and the United Kingdom, and recovery in the manufacturing and construction sectors.

INDIAN OVERVIEW

India is the second largest steel producer in the world with an installed capacity of 154.1 MT in FY22. It is also the second-largest consumer of finished steel with a consumption of 120 MT in FY23. The Indian steel sector has been able to grow over the years due to domestic availability of raw materials such as iron ore and cost-effective labour. The industry has been driven by domestic steel demand from sectors such as construction, real estate, and automobiles, while the vast coastline has enabled exports and imports, making India one of the leading countries in the global steel industry.

In the last 10 years, finished steel production has grown at a CAGR of 2.8% to 122 MT in FY23 from 96 MT in FY14. The growth in production has been backed by a rise in domestic steel consumption on account of growing economic activities in the country supported by an increase in infrastructure and construction spending by the government, a rise in automobile and consumer durable demand, among others.

Domestic finished steel consumption in India has increased at a CAGR of 5.5% to 120 MT in FY23 from 74 MT in FY14. After witnessing an uptrend in steel production, India observed a de-growth of 20.2% y-o-y in FY19 due to lower exports. Further, the outbreak of covid-19 pandemic resulted in a decrease in steel production in FY21, a de-growth of 6.3%.

INDIA'S FINISHED STEEL PRODUCTION & CONSUMPTION

[Source: Report of Assocham on “India Steel Sector Enhancing Competitiveness and Overcoming Challenges” for May, 2023].

TRENDS IN STEEL TRADE

Steel exports from India have contributed to the total off take of steel, in addition to the domestic demand, supported by an increase in the country's overall capacity and production. Exports increased at a CAGR of 10.7% over the period of 9 years from 6 MT in FY14 to 13.5 MT in FY22. Of these 9 years mentioned, India was a net steel exporter for six years - FY14, FY17, FY18, FY20-FY22. In 2021, India's exports accounted for 4.4% of the global exports.

Exports witnessed a reversal in trend during FY23 after an upward trend of exports in 3 consecutive years i.e., FY20, FY21 & FY22 and declined to 6.7 MT compared to 13.5 MT in FY22, a sharp fall of 50.2% y-o-y. The Indian Government imposed an export duty of 15% on a range of finished steel products in May 2022 which made exports from India less competitive in global markets.

Exports were also impacted by weak international demand, continued geopolitical tensions and inflationary headwinds globally. Moreover, India became a net importer of steel for the first time in three years for the period of October 2022 to February 2023. The exports have started to pick up on a sequential basis post the reversal of export duty by Government in November 2022, however, the full impact of the duty removal is

expected in export volumes by the first half of FY24.

INDIA'S FINISHED STEEL EXPORTS

[Source: Report of Assocham on “India Steel Sector Enhancing Competitiveness and Overcoming Challenges” for May, 2023].

The exports to the top 5 countries (Italy, Vietnam, UAE, Belgium and Nepal) accounted for 49% of the total outbound shipments from India during FY23. Italy, Belgium, and UAE continued to remain the top importers of Indian finished steel products. Among others, the shipments to USA and Turkey totaled 807 thousand tons and constituted 5.6% and 5.5%, respectively, of the total exports from India.

IMPORTS

Steel imports have increased at a CAGR of 1.1% from 5.5 MT in FY14 to 6 MT in FY23. India mainly imports special-grade steel which is used in end-user segments such as automobiles, defence, shipbuilding, power, railways etc. and is witnessing good traction in domestic marking leading to growth in imports.

INDIA'S FINISHED STEEL IMPORTS

[Source: Report of Assocham on “India Steel Sector Enhancing Competitiveness and Overcoming Challenges” for May, 2023].

During the year FY23, India's finished steel imports have grown by 29% y-o-y from 4.7 MT in FY22. This can be attributed to the rise in low-cost imports from Russia and the fall in international prices. China, South Korea, and Japan continue to be the leading suppliers to India with a 72% share in the total imports in FY23.

KEY GROWTH DRIVERS

Steel is consumed by various sectors like construction and infrastructure, engineering & packaging,

automobiles, consumer durables and railways among other sectors. Housing and construction are the largest consumer of steel with a 43% share in FY22, followed by infrastructure with a 25% share, engineering, and packaging with a 22% share and automotive with an 8.5% share.

Construction and Infrastructure

- One of the major drivers for the steel industry is the infrastructure investment thrust by the Government of India. In the Union Budget 2023-24, the government continued its focus on infrastructure development with the allocation of Rs.10,00,000 crore towards infrastructure capital expenditure, an increase of 33% over allocation under the Union Budget 2022-23. Total allocation towards infrastructure, including investments in public enterprises, stood at Rs. 14,91,400 crore, an increase of 24.8% over revised estimates of 2022-23.
- The government has expanded the National Infrastructure Policy (NIP) to 7,400 projects from 6,835 projects and announced plans for the National Monetization Pipeline and Development Finance Institution (DFI) to improve the financing of infrastructure projects.
- The NIP covering rural and urban infrastructure, entails investments to the tune of Rs. 111 lakh crore, which is being undertaken by the central government, state governments and the private sector during FY20-25.
- Moreover, the alignment of PM Gati Shakti National Master Plan and NIP will aid in debottlenecking hurdles for faster execution of projects.
- The budget towards infrastructure grew on a CAGR of about 18% in the past 5 years from FY20 to FY24.

Budget allocation towards Infrastructure

[Source: Report of Assocham on “India Steel Sector Enhancing Competitiveness and Overcoming Challenges” for May, 2023].

ROAD INFRASTRUCTURE

- India's road infrastructure has seen consistent improvement in the last few years. Connectivity has improved and road transportation has become a focus of rapid development.
- Total highway construction in India during the period FY23 was 10,993 km compared to 10,457 km in FY22, indicating a construction run rate of 30 km per day.
- The highway construction activity remained flat in FY23, mainly due to a decline in project awarding activity by 2.8% to 12,375 km in FY23 as compared to 12,731 km in FY22.
- This slowdown can be attributed to an increase in input cost, longer-than-usual monsoon and problems related to land acquisition and environmental clearance.
- About 12,000 km of highways are expected to be constructed in FY24 at an estimated capital expenditure of Rs 4 Lakh Crore.

Residential Real Estate

- In FY23, the residential real estate market witnessed steady growth with increased sales momentum supported by past inventory levels and continued new project launches specifically in the affordable and mid-size segments.
- The housing market in general is seeing growth due to an increase in commercial activities, the need for upgraded infrastructure and living spaces, and an improved economic scenario.
- Growth in various sectors like BFSI and e-commerce segment, increase in savings because of work from home trend in the last 2 years and increase in demand for better spaces to live, have led to an

increase in first-time home buyers. There is also an increase in the mid-segment housing projects due to increase in urbanization and per capita income.

- Government initiatives like Pradhan Mantri Awas Yojna (PMAY), Urban Development Plan and digitization of land records have also added to the growth in the sector. Rural and Urban housing construction under the Pradhan Mantri Awas Yojana has gained traction in FY23.
- Under the PMAY scheme of the Union Ministry of Housing and Urban Affairs, more than 1.20 crore houses have been sanctioned under the PMAY-Urban, out of which 73.87 lakhs have been completed as on May 10,2023, and the rest are under construction.
- In addition to that, about 2.85 crore houses have been sanctioned under PMAY-Gramin out of which 2.25 crore have been completed.

Automobiles

- India was the third-largest automobile market in 2022. It is expected the domestic automobile sales volume to grow by 7-9% in FY24 and the growth momentum is expected to continue after the robust demand (20% sales growth) seen in FY23, supported by favorable demand sentiments and various government initiatives for rural and urban development.
- Passenger vehicles and commercial vehicles are expected to drive demand, while two and three-wheelers will gradually increase sales and cross the pre-pandemic level. However, inflationary pressure, price hikes due to regulatory changes, and higher cost of ownership might potentially affect demand in FY24.
- The growth in the automobile sector will also be supported by electric vehicles (EV) as the shift in demand of consumers towards electric vehicles is increasing.
- In the Union Budget 2023-24, the allocation towards the FAME (Faster adoption and manufacturing of EVs) scheme has increased to Rs.5,172 crore from Rs.2,908 crore in the previous year. Further the cut in customs duty on lithium-ion batteries from 21% to 13% will also result in an increase in sales and accelerate the demand for EVs. This will aid the growth in the auto sector.

Others

- The growth in the urbanisation will lead to increased demand for steel as it involves usage in the construction of buildings, pipes for water supply, improved drainage systems, waste treatment plants, elevators etc.
- On August 15, 2019 the government launched “Jal Jeevan Mission” Programme, with an aim to provide safe and adequate drinking water through individual household tap connections by 2024 to all households in rural India. The mission has always seen a consistent allocation in the Budget every year.
- In the Union Budget 2023-24, the allocation towards Jal Jeevan Mission has increased to around Rs. 70,000 crore from Rs. 60,000 crore in the previous budget. Under this Programme, steel pipes will be used for the distribution of water due to its non-corrosion and non-rusting characteristics. This Programme has already covered 61.4% of rural households in 3.9 years.
- Another initiative ‘One Nation, One Gas Grid’ will attract new investments in India’s natural gas infrastructure, which uses steel pipes. It is expected that the gas pipeline network, which is more than 22,000 km currently, will reach 35,000 km in the coming 4-5 years. The efforts of moving towards the gas based economy along with the implementation of city gas distribution networks are expected to augment the demand for pipes going forward.

Driven by rising infrastructure development and growing demand from sectors like automotives, construction, consumer durables & capital goods, India’s per capita consumption of steel grew from 46 kgs in FY08 to around 75 Kgs now. Even though consumption of total finished steel has increased considerably, Indian steel industry still has significant potential for demand led growth, underscored by the fact that the per capita steel consumption in the country at 70 kgs is much lower than the global average of 227.5 kg. The need of the hour is not just to enhance domestic steel consumption, but also creating a demand for Indian steel abroad and giving a boost to steel exports.

Indian Steel Prices

Steel prices have remained range-bound from March 2018 to June 2019 and started to fall thereafter as the economy was hit by the pandemic. During FY21, the average domestic finished steel prices peaked at Rs 71,157 per tonne as on March 2021. Since then, the prices increased throughout CY21 on account of a revival in domestic demand as economic activities began to take place after the upliftment of restrictions and lockdowns.

During CY22, prices have been impacted by the geo-political war between Russia and Ukraine (since February 2022) and stood at Rs 85,820 per tonne as of March 2022. The geopolitical crisis situation continued and the prices were

further pushed to Rs. 88,498 per tonne in June 2022 quarter. The escalation in prices was also because of the rise in coking coal and iron ore prices globally. However, after a sharp rise, the prices declined by around 16% in September 2022 as compared to the previous quarter. Furthermore, they fell to Rs 71,326 per tonne in December 2022. This decline was caused by the imposition of an export duty on a range of finished steel products from the period May 2022 to November 2022, leading to lower exports and an increase in domestic inventories. In addition to that, softening of iron ore prices also affected the steel prices in the domestic market.

Domestic average finished steel Prices

[Source: Report of Assocham on “India Steel Sector Enhancing Competitiveness and Overcoming Challenges” for May, 2023].

After the reduction in export duty on iron ore in November 2022, domestic prices began to rise. In January 2023, NMDC increased the prices for iron ore lumps and fines, which further boosted the prices. As of March 2023, iron ore prices stood at Rs. 4,383 per tonne, a growth rate of 8% as compared to December 2022. This rise in raw material prices resulted in higher domestic steel prices. Going forward, it is expected that domestic steel prices will continue to track global prices and remain range-bound due to continued strong domestic demand.

Outlook

Indian Steel Industry contributes to all the facets of economy, including GDP, industrial and infrastructural development. The steel industry contributes approx. 2.5% to national GDP, employing 2.5 million people, directly & indirectly. The output effect of steel on Indian economy is approx. 1.4 times, with an employment multiplier of 6.8 times.

As India has entered its pre-election year in 2023, the government is likely to increase investments both at the state and central levels and this is expected to augur well for the domestic steel demand.

Some of the key budgetary announcements, which reflect the same, are:

- An increase in allocation of capex towards infrastructure from Rs.7.5 lakh crore to Rs.10 lakh crore in Union Budget 2023-24.
- The capital outlay of Rs.2.4 lakh crore for Indian Railways.
- 100 transport infrastructure projects.
- Approval of Production Linked Incentive (PLI) Scheme for specialty steel.
- Allocation towards PMAY scheme to be increased to Rs. 79,590 crore from Rs. 48,000 crore in previous budget
- Allocation of Rs 10,000 crore towards Jal Jeevan Mission.

The National Steel Policy, 2017, envisages the steel production to almost double to 255 MT by FY31 to cater to the growing domestic demand. To continue to be Atmanirbhar in steel, it is imperative to secure a sustainable supply of raw materials such as iron ore and coking coal. India has sufficient reserves of iron ore; however, the production needs to be ramped up through the identification and auction of a higher number of captive and commercial mines and an increase in production from existing mines by using better technology.

India is dependent on imports due to limited domestic availability of suitable quality coking coal. As a near-term measure, the import sources must be diversified to ensure timely availability and better pricing. Further, exploration and

production of domestic coking coal should be encouraged and sufficient washing capacities should be set up to get the desired quality of coking coal. Both iron ore and coking coal mining can be encouraged by implementing single window clearances, rationalizing taxes and royalties on mining which are currently higher than global benchmarks and boosting overall investment in the exploration and production of these minerals through policy support.

By improving logistics infrastructure and enhancing rail connectivity, the steel industry can effectively mitigate logistical challenges and reduce costs. This, in turn, will enhance the overall competitiveness of domestically produced steel, bolstering its position in the global market. Industry stakeholders, policy-makers, and the Railway Ministry need to collaborate and prioritize the development of efficient transportation systems to support the targeted growth of the steel industry in India.

The future of the steel industry has to also be responsible and sustainable growth focused on reducing carbon emissions and moving towards de-carbonization. The industry is already implementing measures such as increasing the usage of renewable energy in the production process, use of pulverized coal injection (PCI) in the blast furnaces, improving efficiency by waste heat recovery, suitable use of by-products, usage of steel scrap etc. Future technologies which will significantly reduce the carbon emissions such as green steel and carbon capture utilization and storage have been identified and R&D efforts are being undertaken across the world to achieve viably scalable technologies. The steel industry is evolving its overall Environmental, Social and Governance (ESG) practices to adopt the global best practices which will enable the steel industry to tap larger markets and grow a climate-conscious investor base.

While India is the second largest producer and consumer of steel, it ranks 7th in global exports. With the share of 6% in global crude steel production and 5.7% in global crude steel consumption, India has become one of the steel hubs in the world for both production and consumption of steel. However, Indian products are currently less competitive in global markets compared to their Asian counterparts due to factors such as high finance and logistics costs, high levies on mining and duties imposed by key export countries. To push the ‘local for global’ agenda in the steel sector, policy support will be required to reduce the cost disadvantage coupled with the government’s push through various diplomatic channels to reduce duties on Indian steel products and enter into trade agreements beneficial for the industry.

Aligned with the Government of India’s National Mission of Atmanirbhar Bharat, the National Steel Policy 2017 targets a crude steel capacity of 300 MT by 2030 in the country. The government has taken multiple initiatives over the last decade to encourage steel production and consumption of domestically manufactured steel targeted towards making India ‘Atmanirbhar’ for its current as well as future demand.

Solar Structural Pipes Market Overview:

According to recent reports, India’s renewable energy (RE) sector has experienced a remarkable growth rate of 14% over a five-year period, spanning from FY 2017 to FY 2022. This growth has propelled the country to achieve a significant milestone, reaching a total RE capacity of 114 GW as of September 2022. Notably, solar power constitutes approximately 51% of this overall capacity.

Over the past decade, the share of solar installations in India has exhibited a remarkable compound annual growth rate (CAGR) of 29%, soaring from 4% in FY 2012 to 51% by September 2022. India’s appetite for renewables is growing year on year, the country is now ranked 4th globally in solar power generation. India Solar Energy Market was estimated at USD 38 billion in 2022 and is anticipated to reach around USD 238 billion by 2030, growing at a CAGR of roughly 40% between 2023 and 2032.

As the solar energy industry expands, the demand for various components and infrastructure associated with solar power generation will also experience a substantial increase. Solar structural pipes, which play a crucial role in supporting solar panels and creating the framework for solar installations, may likely see a tremendous surge in demand. Solar structural pipes are used in the construction of ground-mounted solar arrays, rooftop installations, and solar tracking systems. As the solar energy capacity in India increases, more solar farms and installations will be set up, driving up the demand for these pipes.

India’s commitment to expanding its renewable energy capacity, especially solar, is backed by favorable government policies and incentives. This supportive environment shall encourage investment in the entire solar ecosystem, including the production and supply of components like solar structural pipes. In conclusion, the booming India solar energy market may likely have a cascading effect on various industries, including the market for solar structural pipes. The increased demand for solar installations, driven by India’s renewable energy goals and policies, is poised to create substantial opportunities for businesses involved in supplying the necessary components to support this growth.

Indian Agricultural Equipment Market Size and Growth:

The Indian agricultural equipment market size reached INR 1,023.2 billion in 2022. Projections indicate it could reach INR 1,852.6 billion by 2028, exhibiting a CAGR of 10.5% during 2023-2028. Agricultural equipment refers to the various tools, machines, and vehicles used in farming and agriculture. These tools help farmers and agricultural workers to perform different tasks more efficiently, saving time and labor. Some common types of agricultural equipment include tractors, plows, cultivators, seeders, sprayers, harvesters, and irrigation systems. These machines are designed to perform specific tasks such as soil preparation, planting, watering, fertilization, weed control, harvesting, and transportation.

Agricultural equipment has revolutionized the Indian farming industry, allowing farmers to produce more food with less labor and time. This has helped to increase food production and improve food security in India. Agricultural equipment plays a vital role in modern agriculture, helping farmers to produce more food efficiently and sustainably to feed a growing Indian population.

The rapid adoption of modern agricultural techniques by farmers across the country is catalyzing the market. Several key players are constantly innovating and introducing new products to meet the market's evolving needs.

The government of India is also promoting the adoption of modern farming techniques and offering various subsidies and schemes to encourage farmers to invest in agricultural equipment. The growing scarcity of human workforce and heavy expenditure on the maintenance of cattle are encouraging customers to leverage the benefits of modernized equipment in farming applications. This, in turn, is anticipated to provide a boost to the market. In addition, the rising awareness about the benefits of agricultural equipment is strengthening the market.

The Financial Statements have been prepared on accrual basis under the historical cost convention.

The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year, except for changes required by statute.

Use of Estimates

The preparation of Restated Financial Information in conformity with Indian GAAP requires that the management of the Company to make estimates and assumptions that affect the reported amounts of income and expenses of the period, the reported balances of assets and liabilities and the disclosures relating to contingent liabilities as of the date of the financial statements. Examples of such estimates include the useful lives of property, plant and equipment and intangible assets, provision for doubtful debts/ advances, future obligations in respect of retirement benefit plans, etc.

Difference, if any, between the actual results and estimates is recognized in the period in which the results are known.

Current versus Non-Current Classification

The Company's present assets and liabilities in the balance sheet are based on current / non-current classification.

All assets and liabilities which are not current (as discussed in the below paragraphs) are classified as non-current assets and liabilities.

An asset is classified as current when it is expected to be realized or intended to be sold or consumed in normal operating cycle, held primarily for the purpose of business, expected to be realized within twelve months after the reporting period, or cash and cash equivalent unless restricted from being exchange or used to settle a liability for at least twelve months after the reporting period.

2. Consistency: -

It is assumed that accounting policies are consistent from one period to another.

3. Accrual: -

Revenues and costs are accrued, that is, recognized as they are earned or incurred (and not as money is received or paid) and recorded in the financial statements of the periods to which they relate. (The considerations affecting the process of matching costs with revenues under the accrual assumption are not dealt with in this Statement.)

Cash Flow Statements

Cash flows are reported using the indirect method as set out in accounting standard 3 on cash flow statement issued by the Institute of Chartered accountants of India.Q

Property, Plant and Equipment and it's Depreciation and Amortization:

1. Tangible Assets:

Tangible assets are stated at cost of acquisition less accumulated depreciation/ impairment losses, if any. Cost comprises of cost of acquisition, cost of improvement and any attributable cost of bringing the assets to its working condition for intended use.

Subsequent expenditure related to an item of tangible assets are added to its book value only if they increase the future benefits from the existing assets beyond its previously assessed standard of performance.

Losses arising from the retirement of and gain or loss arising from disposal of tangible assets which are carried at cost are recognized in the statement of profit and loss.

Company is providing depreciation on fixed assets on written down value method on pro-rata basis and at the rates prescribed in Schedule II of the Companies Act, 2013.

Impairment of Assets:

Assessment is done at each balance sheet date as to whether there is any indication that an asset (Tangible and Intangible) may be impaired.

For assessing impairment, the smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or group of assets is considered as a cash generating units.

The estimation of the recoverable amount of the assets/cash generating unit is made. Assets whose carrying amount exceeds their recoverable amount are written down to recoverable amount.

Recoverable amount is higher of an asset or Cash generating unit's net selling price and its value in use in the present value of estimated future cash flows expected to arise from continuing use of an asset and from its disposal at the end of its useful life.

Assessment is also done at each balance sheet as to whether there is any indication that an impairment loss recognized for an asset in prior accounting periods may no longer exist or may have decreased.

An impairment loss is reversed to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had previously been recognized.

Borrowing costs:

Borrowing cost includes interest, amortization of ancillary costs incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost.

Borrowing costs that are directly attributable to the acquisition, construction or production of an asset that takes a substantial period to get ready for its intended use are capitalized. All other borrowing costs are recognized as expenditure in the period in which they are incurred.

Inventory:

Inventories are valued at lower of cost and net realizable value. Cost includes cost of materials, services used and other expenses attributable to the projects.

Contingent Liability, Provisions and Contingent Asset:

The Entity creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources, and a reliable estimate can be made of the amount of obligation.

A provision is recognized when an entity has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are

not discounted to its present value and are determined based on management estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current management estimates. Contingent Liabilities are disclosed when the entity has a possible obligation, or a present obligation and it is probable that a cash outflow will not be required to settle the obligation.”

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that probably will not require an outflow of resources or where a reliable estimate of the obligation cannot be made.

Contingent assets are neither recorded nor disclosed in the financial statements.

Current Assets, Loans and Advances:

The balance under item of Sundry Debtors, Loans and Advances and Current liabilities are subject to confirmation and reconciliation and consequential adjustments, wherever applicable. The Gratuity Plan provides a lump-sum payment to vested employees at retirement, death, incapacitation, or termination of employment, of an amount based on the respective employee's salary and the tenure of employment with the Company.

Liabilities with regard to the Gratuity Plan are determined by actuarial valuation, performed by an independent actuary, at each Balance Sheet date using the projected unit credit method.

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from Six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: The phase will be applicable voluntary basis for public issues opening on or after September 1, 2023 and Mandatory for public issues opening on or after December 1, 2023. In this phase, the time duration from public Issue closure to listing is proposed to be reduced to three working days from six working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

OTHER INSTRUCTIONS

JOINT APPLICATIONS IN THE CASE OF INDIVIDUALS

Applications may be made in single or joint names (not more than three). In the case of joint Applications, all payments will be made out in favour of the Applicant whose name appears first in the Application Form or Revision Form. All communications will be addressed to the First Applicant and will be dispatched to his or her address as per the Demographic Details received from the Depository.

MULTIPLE APPLICATIONS

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

- I. All applications are electronically strung on first name, address (1st line) and applicant's status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband's name to determine if they are multiple applications.
- II. Applications which do not qualify as multiple applications as per above procedure are further checked for common DP ID/ beneficiary ID. In case of applications with common DP ID/ beneficiary ID, are manually checked to eliminate possibility of data entry error to determine if they are multiple applications.
- III. Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of “know your client” norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

After submitting an ASBA Application or Application through UPI Mechanism either in physical or electronic mode, an Applicant cannot apply (either in physical or electronic mode) to either the same or another Designated Branch of the SCSB. Submission of a second Application in such manner will be deemed a multiple Application and would be rejected.

An investor making application using any of channels under UPI Payments Mechanism, shall use only his / her own bank account or only his / her own bank account linked UPI ID to make an application in public issues. Applications made using third party bank account or using third party linked bank account UPI ID are liable for rejection. Sponsor Bank shall provide the investors UPI linked bank account details to RTA for purpose of reconciliation. RTA shall undertake technical rejection of all applications to reject applications made using third party bank account.

The Company, in consultation with the Lead Manager reserves the right to reject, in its absolute discretion, all or any multiple applications in any or all categories. In this regard, the procedure which would be followed by the Registrar to the Issue to detect multiple applications is given below:

1. All Applications will be checked for common PAN. For Applicants other than Mutual Funds and FII sub-accounts, Applications bearing the same PAN will be treated as multiple Applications and will be rejected.
2. For Applications from Mutual Funds and FII sub-accounts, submitted under the same PAN, as well as Applications on behalf of the Applicants for whom submission of PAN is not mandatory such as the Central or State Government, an official liquidator or receiver appointed by a court and residents of Sikkim, the Application Forms will be checked for common DP ID and Client ID.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectoral cap i.e. 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. Further, other non-residents applying on a repatriation basis, FVCIs and multilateral and bilateral development financial institutions are not permitted to participate in the Issue. As per the existing policy of the Government of India, OCBs cannot participate in this issue. See “ISSUE PROCEDURE” beginning on page 157 of this Draft Prospectus.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidates FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See “ISSUE PROCEDURE” beginning on page 157 of this Draft Prospectus.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue Period.
